

cool laser

*remove. restore. regenerate*

# *The best medical aesthetic laser on the market, to improve all skin concerns*

More and more men and women have the desire to improve their quality of skin and its appearance, seeking a clinically effective treatment that is fast and desirable results.

Cool Laser inspires clinically significant results in just a few treatments for those seeking an overall improvement in the quality and appearance of their skin. The effectiveness of Cool Laser is in no way affected by skin tone or colour.

Due to the nature of the Cool Laser and lack of damage to the surrounding tissue (typically caused by the heat generated by traditional lasers) is what makes this treatment so appealing.

“I was amazed with the results from Cool Laser; my skin was noticeably fresher and younger”

“I was overjoyed with the results and how quickly my acne scarring started to improve”

“Within 2 to 3 days  
my skin had a lovely  
velvet appearance”

## *What is Cool Laser?*

With its revolutionary short pulse duration, the Cool Laser can deliver clinically significant results lasting up to 1 year.

The Cool Laser will not only remove these unwanted skin conditions and signs of ageing, quickly and efficiently, but also, by using a series of light pulses, it kicks starts the process of developing new collagen and stimulates cell repair, helping the skin condition to be a thing of the past and leaving you with totally transformed new skin.

# The treatment

## *Cool Laser treats:*

- Fine Lines & Deep Wrinkles
- Skin Tightening & Lifting
- Minimises Pores & Scars
- Reduces Dark Circles
- Sun Damaged & Aged Skin
- Pigmentation & Freckles
- All Types of Acne Scarring
- Stretchmark Reduction
- Mole & Skin Tag Removal

## *Pre treatment*

Avoid all use of Vitamin A (Retinol).

Do not expose your skin to sun light or solarium for 4 weeks prior to the treatment (use sun block, factor 50).

Ensure no make-up, face creams or perfumes have been applied to the skin of the area to be treated.

## *During the treatment*

- The skin will be cleansed
- Safety goggles worn
- Optional Local anaesthesia can be applied if necessary
- The laser is directed on to the skin
- A slight warming sensation is felt
- Treatment lasts 20-60 minutes depending on area being treated including after care
- After care Balm and Sunscreen will be applied

## *Post treatment care*

- Protect the skin from exposure to sunlight and solarium radiation for 6 weeks after treatment.
- Apply factor 50 sun block.
- Avoid wearing makeup up to 24 hours
- Skin can have slight erythema after treatment which can last up to a couple of days depending on the level of treatment administered
- The Cool Laser treatment includes, a Calming Oxygen treatment & Collagen Mask. After care products will be provided, from the clinic, to speed up the recovery and healing of the skin.
